

COUNTIT

YOU CAN COUNT ON US FOR YOUR INVENTORY NEEDS

At Variant, we make things happen. We have the hardware and software tools that can help your business:

- ✦ Perform accurate Physical Inventory & Cycle Counts
- ✦ Save time by using the latest technology
- ✦ Save money by doing more with fewer personnel
- ✦ Adapt to your existing system

Our hardware and software solution can help you perform your physical inventory and cycle counts faster and more accurately than ever before.

Countit is a cost-effective tool that gives you the power to correct internal inventory discrepancy issues and create unique company-specific solutions.

OUR SOLUTION IS BASED ON:

SaaS, one of three main categories of cloud computing, together with IaaS (infrastructure as a service) and PaaS (platform as a service).

SaaS eliminates the need for organizations to install and run applications on their own computers or in their own data centers. This cuts costs in hardware acquisition, provisioning, and

maintenance, as well as software licensing, installation, and support.

Rather than purchasing additional hardware and software, only pay for the use of the hardware and software for as long as you need it.

 <p>COUNTIT EASY TO USE</p> <p>Inventory counters are presented with straight forward, easy to understand prompting sequences in a user-friendly tablet that guides them through the counting activity. The result is accurate count information the first time, without costly exception handling.</p>	 <p>COUNTIT ACCURATE</p> <p>Traditional paper and pencil inventory counting methods require the use of tags or forms, team counting at each location, hand written documents, keying in collected forms, and lengthy shutdowns. With Countit, all forms, tags, key entry procedures, and hand written information are eliminated, while the number of counters is reduced. By doing this, you vastly improve accuracy.</p>
 <p>COUNTIT COMBINABLE</p> <p>Countit was designed and built to easily integrate with external sources from the ground up. You can integrate with one or more host environments simultaneously. Virtually any host platform is supported.</p>	 <p>COUNTIT TIME-SAVING</p> <p>Time is money, and the benefits of using Countit will save a tremendous amount of time. In fact, most customers cost-justify their purchase within the first use. Time is saved with easy installation, accuracy, and the ability to instantly access count information.</p>

Other benefits of the SaaS model include:

Rather than purchasing additional hardware and software, generally you only pay for the use of the hardware and software for as long as you need it.

"Our experience over time has shown us that the Countit tool saves resources and provides a real added value."
